

# International Conference VIBROENGINEERING 2013

November 22-24, 2013, Hainan Island, China  
[www.jve.lt/VIBROENGINEERING2013/index.htm](http://www.jve.lt/VIBROENGINEERING2013/index.htm)

Original developments in vibroengineering of dynamical systems (macro-, micro-, nanomechanical, biomechanical systems and engineering structures) are cordially invited for the presentation at Vibroengineering 2013.

## Topics

Nonlinear dynamical systems and chaos; Analytical and computational investigation of nonlinear dynamical systems; Vibration and wave technologies; Nonlinear oscillations; Shock & vibration; MEMS & MOEMS dynamics; Generation of vibrations and waves; Stabilization and control of linear and nonlinear systems; System identification & diagnostics; Vibration measurement and monitoring.

## Important dates and submission method

Short paper (up to 4 pages) submission before May 1, 2013

The decision on the acceptance will be e-mailed to authors until June 1, 2013.

The short paper in Word format should be submitted as a file attachment to the e-mail address: [vibro2013@jve.lt](mailto:vibro2013@jve.lt)

## Publication information

All short papers will be published in the Proceedings of the International Conference Vibroengineering 2013 in the Institute of Physics Proceedings <http://iopscience.iop.org/1742-6596/> referred in ISI Proceedings (Thomson Reuters) and Compendex. All participants will have the option to prepare the Extended version of their papers (no page limit). Extended papers will be considered for publication in the Special Issue of Journal of Vibroengineering.

## Registration

The registration fee for participants (speakers) is 350 EUR and includes the acceptance to all sessions, a printed copy of the Proceedings (available at the Registration Desk at the Conference), coffee brakes during the Conference and the Social Dinner after the Conference. This registration fee must be prepaid before the Conference. The registration fee for participants (listeners who do not wish to publish in the Proceedings) is 150 EUR and includes the acceptance to all sessions, coffee brakes during the Conference and the Social Dinner after the Conference. This registration fee can be prepaid before or at the Conference desk. Both Registration fees do not include the accommodation expenses during the Conference and the publication costs in Journal of Vibroengineering. A special page fee will be arranged for all participants wishing to publish in Journal of Vibroengineering (pending successful review) – 20 EUR/page. Certificates will be issued for all participants at the registration desk of the Conference.
