Dynamics and Vibration Engineering have been paid very high attention and attracted more and more interests by academy and industry. It is a fundamental and interdisciplinary research and application. In the knowledge engineering era, how to provide techniques for producers and manufacturers has been an important factor in enhancing enterprise's international competitive advantages. This special issue will focus majorly on the potential engineering application of dynamics and vibration problems in industry where core technology and innovative service are to be organized. It is expected to be a key issue for the R&D engineers in industry.

### **Editorial Board**

**Zongyu Chang**, Ocean University of China, P. R. China

**Chien-Hung Liu**, National Chung Hsing University, Taiwan, Republic of China

**Yu-Fen Chen**, National Formosa University, Taiwan, Republic of China

**Yi-Chang Wu**, National Yunlin University of Science & Technology, Taiwan, Republic of China

**Gow-Yi Tzou**, Kao Yuan University of Sciences and Technology, Taiwan, Republic of China
