MME Mathematical Models in Engineering

Aims and Scope
MME publishes mathematical results which have relevance to engineering science and technology. Formal descriptions of mathematical models related to engineering problems, as well as results related to engineering applications are equally encouraged.

Applications of mathematical models in financial engineering, mechanical and aerospace engineering, bioengineering, chemical engineering, computer engineering, electrical engineering, industrial engineering and manufacturing systems, nonlinear science and technology are especially encouraged.

Mathematical models of interest include, but are not limited to, ordinary and partial differential equations, nonlinear analysis, stochastic processes, calculus of variations, operations research.

All published papers are peer reviewed and crosschecked by plagiarism detection tools.

Contents

36. **Kinematics Simulation Analysis and Trajectory Planning of a Moving Robot Based on ADAMS**
   Yujuan Zhao, Hongping Wang  
   71

37. **Reliability Analysis of an Engine Under Uncertainty Based on D-S Evidence Theory and Bayesian Network**
   Zhi Qiang Li, Ting Xue Xu, Jun Yuan Gu, Lin Yu Fu, Qi Dong  
   78

38. **Manufacturing and Characterization of CNT Based Polymer Composites**
   G. Satish, V. V. S. Prasad, Koona Ramji  
   89

39. **Benchmark Solutions of the Free Vibration of Simply Supported Laminated Composite Plates**
   Xinwei Wang  
   98

40. **Improved Numerical Approximation of Dry Friction Phenomena**
   K. Ragulskis, P. Paškevičius, A. Bubulis, A. Pauliukas, L. Ragulskis  
   106

41. **Modeling and Simulations on Automated Vehicles to Alleviate Traffic Congestion**
   Jincai Chang, Zhiuo Wang, Tong Xiao, Xing Xin  
   112

42. **A Multigrid Method for EHL Line Contact Problem with Grease as Lubricant**
   B. Vishwanath Awati, Shankar Naik  
   126

43. **Research on Mobile Robot Path Planning Based on Improved Artificial Potential Field**
   Zhang Yujiang, Li Huilin  
   135
